1 A reappraisal of **gentrification**: towards a 'geography of **gentrification**'

[Lees, L](#)

Sep 2000 | [PROGRESS IN HUMAN GEOGRAPHY](#) 24 (3) , pp.389-408

The **gentrification** literature since the mid-1990s is reappraised in light of the emergence of processes of post-recession **gentrification** and in the face of recent British and American urban policy statements that tout **gentrification** as the cure-all for inner-city ills. Some tentative suggestions are offered on how we might re-energize the **gentrification** debate. Although real analytical progress ... [Show more](#)

1 **Moving towards integration: The housing of asylum seekers and refugees in Britain**
Phillips, D
Jul 2006 | HOUSING STUDIES 21 (4), pp.539-553
120 Citations
51 References

The government has explicitly identified housing as a key dimension of its strategy for refugee integration, the goal being to assist new migrants to access decent, safe, secure and affordable accommodation. Yet the evidence suggests that many asylum seekers and refugees experience housing deprivation and insecurity. The presentation of British integration practices...

1 **Asylum seekers and refugees** in Northern Ireland: the impact of post-migration stressors on mental health

[Murphy, F and Vieten, UM](#)

Jun 2022 | IRISH JOURNAL OF PSYCHOLOGICAL MEDICINE 39 (2) , pp.163-172

Objectives: In recent years, Northern Ireland has seen an increase in the numbers of **asylum seekers** and **refugees**. Given its status as a post-conflict region, this is a relatively new phenomenon for the area. Northern Ireland is also the only part of the United Kingdom (UK) without a refugee **integration** strategy. In 2016, we conducted an extensive study for the racial equality unit of the Office ... Document Type **Article**

Abstract **Housing** has always had a close association with **refugees** but despite this, the knowledge base about **housing** and its impact in the lives of **refugees** lacks cohesion. The accommodation of **refugees** tends to be connected with broader neo-liberal trends, alongside a general animosity towards **refugees**, culminating in an overt, or implied, 'hostile environment'. This paper synthesises the evidence to understand several key issues in the settlement of **refugees**, including: the role and impact of **housing** policies, the impact of **housing** quality, tenure, **housing** support workers and how the diversity of the refugee population affects the evidence. We also point towards gaps in the knowledge base and the challenges faced by **refugees** in order to help challenge the wider structural inequalities. In this discussion, our focus is the United Kingdom (UK), although the paper draws on literature from other countries.
